

Bringing luxury to water level

*Due to design changes and improvements, the Platforms present in the pictures may not exactly depict the product purchased by the consumer.*

## NautiBuoy

Designed by yachtsmen, for yachtsmen

After 4 years of research, prototyping, refining, compliance and wavepool testing, NautiBuoy proudly present their elite range of multi-functional platforms and accessories.

Available in four different sizes, the NautiBuoy Marine Platform is stable, simple to manoeuvre and easy to lift from the water. These are the essential features but we didn't stop there. From stainless steel D-rings to soft handles that don't scratch the boat or mark the deck, we've thought it all through.

One of the key features is our unique Air Toggle System, which as well as allowing platforms to be linked in multiple configurations\*, provide a 2nd air chamber for safety.

Our platforms are handmade to the highest standard. There's been no compromise on quality – we've obsessed over every minute detail to bring you a product that will exceed your expectations.

A simple **three step** process, just choose your Platform Series, Size and Surface.

Page 34

# Leisure

## Floating comfort

### Relax at Water level

Unparalleled luxury at water level. A unique place to share and enjoy the finer things in life whilst relaxing in comfort on one of our platforms.

Offering freedom from the confines of the yacht, a new space that's perfect for sunbathing, finding that moment of peace, or enjoying a blissful sunset.

## Your own private island

### Perfect serenity

Add a new perspective to your yachting experience by taking the comforts of the yacht even closer to the shore. With the NautiBuoy Marine Platform streamed off the back of the yacht or anchored off the beach, you can choose exactly where you want to be and create perfect serenity.

“Relaxing at water level is not possible onboard, so it adds another dimension to our guests’ charter experience. They now have the ability to swim to their own small island with its own boarding ladder, float around in peace in the shallow water, and enjoy the sun whilst dangling their legs in the water in silence”.

T. Endersby, MY Heavenly Daze

## Fun & safe watersports

### Made even easier

A great place to have fun in the water with friends and family. You and your guests can enjoy a multitude of sports and activities, easily swapping from one to another. Not only does it provide you with a fantastic swim platform, but also an ideal area for sunbathing and relaxing.

Covered with a non-skid soft surface and made incredibly stable by a unique ballast system, the NautiBuoy Platform offers a safe spot for activities on the water.

## Yoga & fitness

### A different dimension

Discover an alternative place of freedom to enhance your fitness and meditation practice. With no disruptions, you can focus solely on your physical well-being and mental state of clarity. Enjoy the freshness of the breeze, the warmth of the sun and the calming movement of the ocean. Create a new space that's just for you.

# Leisure Accessories

## Floating comfort

### Accessorise for extra enjoyment

Relaxing so close to the water is one of life's most enjoyable pleasures. You can enhance your sunbathing and relaxation by adding that extra layer of comfort and luxury to your platform.

Leisure packages enable you to adapt the platform. There's also a 4-step ladder that makes getting out of the water a breeze.

## Classic or luxury

### What ever your preference

Take your pick from two superb leisure packs – the Classic or the Luxury Leisure Package.

Both packs include two portable comfort seats, two fastening belts and two luxury headrests. The difference is in the size of the seats.

## Comfort seats

### Relax

The comfort seat combines quality, beauty and comfort with innovative design. Whether you prefer to relax on the platform, the boat or the beach, the comfort seat makes an ideal spot to unwind.

Made from high quality Sunbrella® fabric specially designed for outdoor use, the comfort seats are hinged to provide both back and leg support. They have no hard exterior parts and come with the added benefit of stowing completely flat.

You don't have to worry about the seats going overboard. The fastening belt secures the seats to the platform in one easy step. They've been designed for easy removal so you can use the seats wherever you choose.

The Classic Comfort Seat features in the images throughout.

**Classic Comfort Seat (smaller of the two)**  
Size: 145cm x 48cm x 8cm / 4'9" x 1'7" x 3"

**Luxury Comfort Seat (larger of the two)**  
Size: 195cm x 58cm x 10cm / 6'5" x 1'11" x 4"

## Luxury headrests

### Enjoy

Sunbathing is made even more pleasurable with the two luxury headrests.

Like bringing your bed pillow to the platform, the headrests provide a snug but firm support whilst you stretch out, relax and enjoy a cool calm moment.

A marine grade solution made from faux leather and a quick dry foam filling, they're designed to be easily attached to the platform. They're also the ideal accessory to wrap in a towel and take to the beach.

## Securing your accessories

### Velcro fastening

All the platforms come as standard, with two soft Velcro strips strategically located on the top surface. The comfort seats and headrests sit firmly on the strips and have been tested for their secure fastening in a University Wave Lab. There's no fear of losing them to the sea when the wind or swell picks up.

See the wave tank in action at [nautibuoymarine.com](http://nautibuoymarine.com).

## Climb on board

### Gracefully exit the water

The user-friendly 4-step ladder makes it safe and simple for you to get back on to the platform.

The ladder locks securely and easily into place using the Multipurpose Platform Mountings (MPM's) positioned at one end of the platform. Further support is provided by the Air Toggle loops that fit snugly under the adapted ladder arms, enabling the ladder to carry up to 100kgs (220lbs).

With the frame fabricated from marine grade 316 stainless steel and with four smooth contour plastic steps, the ladder is a must have accessory for any keen swimmer.

Due to design changes and improvements, the ladder present in the picture may not exactly depict the product purchased by the consumer.

## Stability

### What makes it so stable

Our unique patent pending ballast system provides incredible stability to the platforms when they're on the water. Filling up quickly the four ballast bags, positioned in each corner, provide you with a stable surface almost instantly. It couldn't be easier to remove the platforms after use. The manual dump system has been carefully designed to expel the water rapidly and for you to effortlessly remove them from the sea.

# Extra space without the expensive refit

## The simple upgrade

The NautiBuoy platforms are an easy way to extend your yacht, regardless of your vessel size or type.

“I’m a boat owner and I would love another meter or so which leaves me with a few options. Buy a bigger boat, but that would mean a bigger berth or, extend my transom with or without hydraulic rams. Either way its a quick €20,000.00.”

I want bigger because as boaters know, we all find we have more friends than we thought we had, when then sun comes out and the seas warm up.

It’s nearly 8 square meters of entertaining space and for the whole of summer it was full of ladies or children. It was a serious bit of boating brilliance that added huge dollops of space and fun at a third of the cost of any other option.”

Phillip J Ashworth, 40ft Atlantis Owner  
(675 Platform)

Platform type = Extra space gained	Stowage sizes

# C-Dock

## Avoid Lifting

A “garage” at water level

The docking station compatible with Seabobs is another modular addition to the NautiBuoy inflatable range.

The C-Dock offers you peace of mind, providing your Seabob with a convenient method of protection, from yachts, jet-skis and other watersports equipment. With buckle and webbing security straps. It's not going anywhere.

## C-Dock Sport

The Sports C-Dock offers a unique “RIB collar” style solution, that is even more lightweight, stowable and quick to inflate.

## C-Dock Voyager

With a luxurious teak foam finish and drop stitch core this version has been designed with the same key features as the Sports Series.

Compatible with all sizes in the NautiBuoy platform range the Voyager C-Dock offers a smooth continuation of the NautiBuoy platform lines.

## Solo or Multiple

The flexibility to choose

Available in 2 different options the C-Dock offers versatility due to it's solo & modular nature.

With options to anchor, tether, be connected to other C-Docks or to NautiBuoy platforms the choice & flexibility is yours.

## The drive-in, drive-out solution

"Excellent Product. Superb Quality. We highly recommend it"

Michael Chlewinski - Seabob

Compatible with F5, F5S & F5SR Seabob models

# Sport Series

## The Streamlined Platform

### Add valuable deck space

The Sport Series platforms are a fantastic solution to providing extra, valuable outside space to yachts of all sizes.

They have been simplified and stripped back to create a streamlined, more cost effective alternative. They have all of the key features provided on the Voyager series, except they are only capable of end-to-end linking.

Ideal for streaming off the back of a vessel or simply anchoring off ones favourite beach. The Sport Series Platforms are essential for yachts looking for more relaxation area.

These can still be used with all of the leisure and maintenance accessories.

# Voyager Series

## Endless possibilities

### Secure & simple connections

One of the key features of our platforms is the Air Toggle System, which as well as allowing them to be linked in multiple configurations\*, also provides a 2nd air chamber for safety.

## Configurations

### The freedom to choose

The revolutionary patent pending Air Toggle linking system is unique to NautiBuoy Marine. Quick and easy to inflate, you can change configurations with very little time and effort.

Cleverly designed, the system enables you to link all four platform sizes to one another to create

anything from jet-ski docks to longer pontoons and shapes that allow access to any part of your yacht.

The Voyager series enables all linking configurations. The Sports series end-to-end only.

Also, if you have a Seabob you can now add the new C-Dock to your chosen configuration (page 24).

### End-to-end linking

Allows for longer maintenance platforms, walkways and pontoons

*Voyager & Sport*

### Jet-ski dock (T-shape)

Makes an ideal jet-ski dock

*Voyager, with option to use a Sport as the finger pontoon*

### Side-by-side linking

Creates a wider space for your own private dock or dinner party

*Voyager only*

### L-shape linking

Makes a great drop off point for guests in a tender

*Voyager, with option to use a Sport as the finger pontoon*

## Jet-ski dock

### Soft landings

By simply connecting any two platforms in a T-shape, you're able to configure your own jet-ski dock. This limits any damage to transoms and jet-skis, as well as providing a safer, easier transfer for yourself and your guests.

## How Air Toggles work

### Versatile, simple and easy to use

All of our platforms have strategically positioned soft loop vertical handles. Simply undo the Velcro to release the Air Toggle loops for your desired configuration. The platforms can then be pulled together (fig. 1) and linked securely. By inserting the deflated Air Toggle through the loops and inflating, you are able to create an instant entrapment free connection (fig. 2). To add extra security when linking platforms connection straps are provided.

When linking platforms side by side, longer toggles are required.\*

Fig. 1

Fig. 2

## Safety

### The entrapment free connection

Not only does the Air Toggle System add flexibility with connection, it also provides our platforms with a 2nd air chamber for safety, meeting strict EN 15649-1-2-3:2012 compliance regulations.

Designed to stop the platforms rising and falling on top of each other in swell, they also prevent possible entrapment between connected platforms. The Air Toggle system keeps the platforms level with each other during any movement.

# The right platform for you

## Three simple steps

### Choose your series, size, surface and accessories

With a vast range of platforms to choose from, we have found the following flow of choice works well in establishing the perfect platform/s for your unique requirements.

First choose the series of Platform you require, Sport or Voyager, then the size or sizes that suit your vessel, followed by the surface you prefer then finally any accessories you wish to enhance your experience.

NautiBuoy's CAD team are also on hand if you require drawings for your particular vessel's requirements.

## Choose your:

# 1. Choose your series

## A Platform for any use

We offer two different series of platforms, designed to suit every type of vessel's requirements, function and budget. Whether you want to construct a jet-ski dock or runway, add an extra sunbathing area or simply have a platform to work from, our range of platforms will fulfil your various needs.

## Sport Series

### End-to-end linking only

Designed as a cost effective alternative to the Voyager, the Sports Series has all the key features of the Voyager Series other than the endless linking possibilities.

With Air Toggle linking just on their ends, they are great to create solo swim platform extensions, private islands & walkways. They

can also be used connected to a Voyager as the finger pontoon of a jet-ski dock.

The Sport Series with Diamond surface makes an excellent maintenance raft.

C-Docks can be attached on to the platform ends only.

Sport Series can link to **either end only**.

End to end linking

Sport series makes a perfect solo platform.

Both series feature:

- 4 sizes available
- German PVC, a trusted alternative to Hypalon
- Teak or Diamond finish
- Accessory Pack included
- 1 x Air Toggle
- Same accessories available
- 4 x 40 Litre Ballast Bags with quick dump system

## Voyager Series

### Endless linking

The beauty of the Voyager Series is their endless linking capabilities, allowing you to create the perfect shape and size of extension to suit your yacht.

With options to create large traditional beach clubs, jet-ski pontoons, Seabob docking stations,

walkways, diving platforms, private islands or almost any other use you can think of.

Plus you have the flexibility to link the C-Docks to all sides of the Platforms

Voyager Series can link **on all four sides**.

End to end linking

Side by side linking

Jet-ski dock (T-shape)

L-shape linking

# What will you build?

## Popular configurations

With our modular design all of our products work with one another allowing you to build exactly what you need. The diagrams on this page represent a small proportion of what you

could do, but also give you insight into how each of the Series can work with one another. The Voyager series can link on all 4 sizes and the Sport series can link onto it's ends only.

When linking multiple platforms, of 3 or more, it is advised to consult with NautiBuoy's team of experts. They are on hand to help design the perfect, safest fit for your unique requirements.

# 2. Choose your size

## Platform sizes

Which size suits you?

All our platforms are made from 200mm (7.5") deep dropstitch, pack down to a conveniently stowable size and with 4 different sizes, there is a platform to fit every yacht.

 Dimensions	2.5m x 1.5m (8'2" x 4'11")	3.5m x 1.5m (11'5.5" x 4'11")	4.5m x 1.5m (14'9" x 4'11")	4m x 2m (13'1.5" x 6'6")
 Stowage dimensions	 155cm x 30cm x 30cm (5'1" x 1' x 1')	 165cm x 33cm x 33cm (5'5" x 1'1" x 1'1")	 165cm x 38cm x 38cm (5'5" x 1'3" x 1'3")	 220cm x 32cm x 32cm (7'3" x 1'11" x 1'11")
 Inflation/deflation time (250mb/3.6psi)	1m 30 secs	1m 40 secs	2m 40 secs	3m 30 secs
 Max users				
 Max load	410kg (903 lbs)	480kg (1058 lbs)	600kg (1322 lbs)	700kg (1543 lbs)
 Weight out of bag	20kg (44lbs)	26kg (57lbs)	31kg (68lbs)	42kg (93lbs)
 Weight in bag	23kg (50lbs)	29kg (63lbs)	34kg (75lbs)	46kg (101lbs)

All dimensions, weights and times indicated have a tolerance of plus or minus 5%.

### 3. Choose your surface

#### Teak

- More traditional look
- Teak effect PE foam
- Looks and feels great
- Soft underfoot & comfortable on the skin
- Repels water
- Easy to wash out stains (tested with suntan cream SPF50, coffee, red wine & cola)
- Non- Skid
- UV resistant – tested to 3000 hours
- Heat resistant up to 110° Celsius / 230° Fahrenheit
- Rolls up and stows easily on and under rib-collars, or in sail lockers & lazarettes

#### Diamond

- Contemporary look for the more modern yacht.
- Non- skid German PVC
- Easy to clean
- More cost effective than Teak
- Easy to convert into a maintenance platform
- Robust, durable & hard wearing
- Light grey finish repels heat
- Has the flexibility to be folded as well as rolled so they can fit into various shaped storage spaces

# Accessories

Which accessories do you require?

## Classic Leisure Pack

The classic leisure pack is ideally suited to the smaller yacht limited on storage space.

The classic comfort seats stow flat at 145cm x 48cm x 8cm / 4'9" x 1'7" x 3".

Each pack comprises two portable classic comfort seats, two fastening belts & two luxury headrests.

## Luxury Leisure Pack

The ultimate in comfort, the luxury comfort seats are longer, wider & thicker measuring 195cm x 58cm x 10cm/ 6'5" x 1'11" x 4" when stowed flat.

Each pack comprises two portable luxury comfort seats, two fastening belts & two luxury headrests.

## Transom Bumpers

To avoid Platforms drifting under the stern. Transom Bumpers can be effortlessly fastened to the surface of the platform (20cm/7.5" in height) adding another 35cm (1') in height.

These are suitable for Transoms up to 0.45m (1'6").

## Boarding Ladder

Made from 316 marine grade stainless, this user friendly 4-step boarding ladder makes it safe & simple to get back on to the platform.

## Maintenance Pack

Designed to convert the Teak platforms from a guest leisure platform to a fully equipped crew maintenance raft.

Available in 4 different sizes, each pack comes with a protective non-skid maintenance cover, two Velcro bottomed 37 litre collapsible buckets & four hose holders.

For those messier paint jobs the Diamond Platforms can also be converted with the use of the cover.

## Maintenance Add-on

Without the use of the cover, the Diamond Maintenance add-on quickly converts any Diamond Platform into a light work raft.

Each pack comes with two Velcro bottomed 37 litre collapsible buckets, four hose holders, two Suction cups with cleats and two 8m (26') 14mm (0.5") eye spliced polyester dock lines.

## Side Joining Air Toggles

When linking side-by-side use one Air Toggle only for an entrapment free connection. These can be purchased separately for the entire length of your Platform size.

When choosing which Air Toggle is required for side-by-side connection, the length of the shortest Platform in the configuration is the length of Air Toggle which must be used for that connection.

## C-Dock

### Docking station for Seabobs

Available in two different options Sport or Voyager, the C-Dock offers versatility. With options to anchor, tether, connect to other C-Docks or to NautiBuoy platforms.

**Sport** - Offers a unique "RIB Collar" style solution that is even more lightweight, stowable and quick to inflate

**Voyager** - Compatible with all sizes in the NautiBuoy Platform range the Voyager C-Dock offers a smooth continuation of the NautiBuoy platform lines.

# Accessory pack contents

## Accessory Pack

Supplied with every order of Sport & Voyager series

1. Stowable zipless protective bag (x 1)
2. Air Toggle (x 1)
3. Bravo SUP stirrup pump (x 1)
4. Repair kit with instructions (x 1)
5. Bravo Electric Pump (230v or 120v) (x1)
6. Instruction manual (x 1)
7. Connection straps (x 2)

# Transom Bumpers

## Platforms on the stern

Prevent them from drifting under your transom

We recognise that transoms vary in height and design and that platforms have the potential to occasionally drift underneath the stern, particularly when being used as a jet-ski dock.

The inflatable transom bumpers can be effortlessly fastened to the surface of the platform adding another 35cm (1ft) in height. These are suitable for transoms of up to 0.45m (1ft 6").

# Maintenance

## Multi-functionality

Switch easily from guest to crew use

In the relentless pursuit for the perfect solution, we've designed our platforms to have the ability to transform from a guest ready leisure platform into a solid inflatable maintenance tool. Simply add the lightweight, non-skid fitted cover to protect the platform and your crew can easily clean, varnish, paint, polish and have the hull of the yacht looking immaculate before leaving port.

With the addition of collapsible Velcro bottom buckets and hose holders, your crew can work efficiently around the topsides without losing equipment over the side.

Platform with cover

## Yard maintenance

### Where's the marina raft?

You'll never have to play "where's the raft?" in a yard period again. There'll always be a solid multi-purpose inflatable raft to work from whenever you need it. Specifically designed with soft loops and edges, it can sit alongside your vessel for days without you having to worry about any damage.

The platforms can be connected end-to-end for those larger yard period topside projects. There's no limit to the length of platform you can create, and with the addition of triangles to create corners, you can work round any bow or stern. The platforms and triangles can be fully protected using the fitted maintenance covers.

Platform shown with cover

## A tender free solution

### Practical seamanship

The NautiBuoy Marine Platform dramatically simplifies the cleaning and maintenance of superyachts.

The platform can be single-handedly inflated and launched anywhere in less than five minutes, providing instant access to the water line and allowing crew members to work smarter – not harder. Gone are the days of having to detail the tender after a full topside wash down. Our unique ballast bag system provides excellent stability in the water and enables easy removal from the water after use.

Suction cups with cleats are provided†. A simple and convenient tool to attach the platform to the topsides of the boat, they make quick and easy work of manoeuvring your way around the vessel.

Platform shown with cover

## Purely Maintenance

### Platforms for the professionals

The robust Diamond non-skid finish, is durable yet easy to clean which makes these platforms an ideal tool for carrying out paint and varnish work as well as routine weekly wash downs of the hull and daily generator soot removal.

All the Diamond finish platforms within our range can still be linked end-to-end allowing users to make giant working platforms during yard periods.

They can be converted simply into a maintenance tool with the use of a Maintenance add-on.

- Tender Free Solution – eliminates the need to detail the tender, again
- No more searching – a platform on hand at all times
- No damage to the vessel and paintwork – can sit alongside for days
- Stable and easy to remove from the water
- Easy to clean
- Hose Holders and Collapsible Buckets with Velcro bottom to prevent loss overboard

Due to design changes and improvements, the products present in the picture may not exactly depict the products purchased by the consumer.

# Maintenance Accessories

## Dual functionality

### Convert to a maintenance raft

Keep the tender guest ready and use the platform as a fantastic tool for carrying out all topside maintenance instead. As well as being quick to inflate, it's amazingly simple to convert from a guest leisure platform to a fully equipped crew maintenance raft.

## Maintenance add-on

### Convert the Diamond Platforms

Without the use of the cover, the Diamond Maintenance add-on quickly converts any Diamond Platform into a light work raft. Each pack comes with two Velcro bottomed 37 litre/9.77 gallon collapsible buckets, four hose holders, 2 x Suction cups with cleats and 2 x 8m (26ft), 14mm (0.5") eye spliced polyester dock lines.

For those messier paint jobs the Diamond Platforms can still be converted using the Maintenance Pack with the cover.

## Maintenance pack

### Convert the Teak platforms

Each pack comes with a protective non-skid maintenance cover, two Velcro bottomed 37 litre/9.77 gallon buckets, four hose holders, 2 x suction cups with cleats and 2 x 8m (26ft), 14mm (0.5") eye spliced polyester dock lines.

Platform with cover (cover only included in Maintenance Pack)

## Fully protective fitted cover

Non-skid, durable, marine grade construction

Designed to fully protect the platform during all painting, varnishing and washdowns, the cover is user friendly, easy to clean and quick to stow.

The top surface is diamond non-skid for resilience and safety and has two Velcro strips stitched at either end for accessory attachment. The borders are made from high strength, abrasion, mildew and resistant fabric and are designed to fit snugly to the platform. It's been purposefully designed in a light reflective colour to prevent getting hot underfoot. Full access is still available to the valves, MPM's and end Air Toggle loops.

The design of the cover still allows for the connection of platforms end-to-end for those big yard maintenance projects. A connection cover is also available to provide protection to the Air Toggle.

## Collapsible buckets with lids

Simplifies maintenance

Our unique expandable 37 litre/9.77 gallon buckets are not only fantastic for wash downs but also for the storage of paints, varnishes and work tools.

A conveniently portable storage container that packs flat and would be of benefit in any bosun's locker. The Velcro strip on the bottom ensures secure fastening to the platform.

Conveniently sold in pairs so you have one bucket for your soapy water and a storage container for spares.

## Hose holders

Put an end to hose loss

You can now work quickly and efficiently around the vessel without playing tug of war with the hose, keeping it exactly where you need for a trouble free wash down. Two hose holders easily attach to the platform MPM's and hold it in position, whilst you focus on the job in hand. Get those top sides finished in record time.

Platform with cover

# Design

## Designed for yachtsmen by yachtsmen

It's all in the details

### British design

British designed by ex-superyacht crew with 25 years experience. We have European design protection and two patents pending.

### Handmade in Europe

The platforms are meticulously hand crafted and made to our exacting specifications by leading industry professionals.

### Durability

The Platforms are constructed from a dropstitch core, with borders made from Mehler German PVC which is known for its strength and durability.

### Non-skid surface

Both of our surface finishes Teak or Diamond provide a non-skid surface for safety.

### Diamond finish

Our Diamond non-skid PVC surface provides a robust easy to clean finish with a contemporary look.

### Teak finish

Our UV resistant teak look surface is not only soft under foot and comfortable on the skin, it also provides a non-skid floor for safety. European design protected.

### Quick to inflate

Quick and easy to inflate and deflate to 3.6 psi / 250mb. Inflation/deflation times range from approximately 1min 30sec to 3mins 30secs depending on platform size.

### Ballast system

Wave laboratory tested and refined to give superior stability on the water.

### Ballast dump system

The patent pending ballast dump system expels all the ballast water from each bag in one simple, easy movement.

### Rigid

Extremely rigid & stable once inflated due to its dropstitch core and ballast system.

### Easy to Stow

We understand the value of storage space on your yacht. Our platforms can be deflated and rolled into a conveniently stowable protective bag with large internal pockets.

### Easy to remove from the water

After the ballast water has been expelled, platforms are lightweight to remove from the water.

### Air Toggle loops

The Air Toggle loops have an easy tidy-away Velcro system for when not in use. Quick to release and rapid to secure, they keep the platform looking streamlined.

### Soft loops

Only soft loops are used on the bottom and edges of the platform to prevent any damage to the topsides, paint and varnish work, as well as the teak deck.

### Lifting handles/connection points

The Voyager series platform has 4 lifting handles strategically positioned for dual use. They provide lifting points and are used when linking platforms together.

### Stainless steel D-rings

Heavy duty 316 Stainless D-rings designed with extra large bonded pads, ideal for tying the platform to the vessel or attaching jet-skis and watersports toys to the platform.

### Glued & stitched

Teak effect foam stitched and glued for extra reinforcement

### Connection straps

Made from high strength UV resistant webbing with long-lasting corrosion free buckles, these add extra security when linking platforms using the Air Toggle System.

**Multipurpose Platform Mountings**

The Multipurpose platform mountings (MPM's) offer the ability to lock and secure a multiple range of accessories including boarding ladders and hose holders.

**Valve**

Bravo C7 Halkey Roberts inflation valve with internal protective mesh and an easy push release button. The fitting allows for the OV10 pump to be secured into the valve for hands free inflation and deflation.

**Pressure release valve**

All our platforms and Air Toggles are fitted with Leaffield Marine A6 5.5psi/ 379mb pressure release valves. These ensure the release of excess pressure due to the expansion of air in hot temperatures.

**Secure accessories**

To prevent loss of accessories overboard, 50mm strips of Velcro have been stitched to both the top of the platform and the maintenance cover.

**Suction cups with cleats<sup>‡</sup>**

A simple and convenient tool to attach the platform to the topsides, making quick, easy work of manoeuvring around the vessel. (Provided with the Maintenance Packs only)

**Docklines<sup>‡</sup>**

Black 8m (26ft), 14mm (0.5") eye spliced polyester docklines are provided for securing platforms alongside or behind any vessel. (Provided with the Maintenance Packs only)

**Anchor point**

Reinforced double layered 50mm seatbelt webbing, bonded and stitched onto an extra large pad for safety and security. Designed for mooring, anchoring and towing.

**Seatbelt webbing**

For all handles, D-rings and anchor points, industrial 50mm seat belt webbing has been used. The lifesaving technology offers reliable strength and longevity.

**Extra reinforcement**

We've added a double layer of material to protect against wear and tear from the ladder

**Bravo manual stirrup pump with pressure gauge<sup>‡</sup>**

Provided for the inflation of the Air Toggle whilst the users are on the water and also to top up the pressure of the platforms. The pump also allows the monitoring of pressure

**Bravo OV10 pump**

A compact fast inflating/deflating electric pump with Halkey Roberts connection nozzle. Options are available for 230v and 120v. Maximum inflation 3.6psi/250mb.

**Conveniently stowable**

All our platforms role up and fit comfortably into our ziplless protective bags, which can be stowed under rib collars, in lazarettes or most work lockers.

## Materials

### Voyager & Sport

Made from 200mm PVC dropstitch with Mehler German PVC borders and ballast bags. Mehler known for their superior quality PVC, offers a trusted solution.

-  Ultraviolet light resistance
-  Weather resistant
-  High & low temperature resistant
-  Easy to clean
-  Wearproof surface

### Maintaining shape

The dropstitch can be inflated to high pressures whilst maintaining its shape due to the thousands of polyester threads between two layers of fabric. Once inflated to 5.5 psi (379 mb), it creates an incredibly solid base and with the addition of four ballast bags provides you with a strong, stable, floating platform.

## Compliance

### 15649 - 1-2-3 : 2012 Compliant

For your safety the platforms have been rigorously tested to meet strict European regulations (EN) for floating leisure articles for use on the water.

The product has been put through its paces in test houses, wave pools, and on charter and private yachts as prototypes. Through this process design features have been changed and refined, ensuring that you have safe platforms that meet European guidelines.

# Specifications

METRIC - SPECIFICATIONS TABLE

Platform name	Max. no of users	Inflated dimensions (all 20cm deep)	Approximate inflation/ deflation time to 250mb	Stowage dimensions (metric)	Weight out of bag (kg)	Weight in bag (kg)	Max load (kgs)
375	3	2.5m x 1.5m	1m 30 secs	155cm x 30cm x 30cm	20	23	410
525	4	3.5m x 1.5m	1m 40 secs	165cm x 33cm x 33cm	26	29	480
675	5	4.5m x 1.5m	2m 40 secs	165cm x 38cm x 38cm	31	34	600
800	5	4m x 2m	3m 30 secs	220cm x 32cm x 32cm	42	46	700

IMPERIAL - SPECIFICATIONS TABLE

Platform name	Max. no of users	Inflated dimensions (all 7.5" deep)	Approximate inflation/ deflation time to 3.6psi	Stowage dimensions (imperial)	Weight out of bag (lbs)	Weight in bag (lbs)	Max load (lbs)
375	3	8'2" x 4'11"	1m 30 secs	5'1" x 1' x 1'	44	50	903
525	4	11'5.5" x 4'11"	1m 40 secs	5'5" x 1'1" x 1'1"	57	63	1058
675	5	14'9" x 4'11	2m 40 secs	5'5" x 1'3" x 1'3"	68	75	1322
800	5	13'1.5" x 6'6"	3m 30 secs	7'3" x 1'11" x 1'11"	92	101	1543

## The Foundation of NautiBuoy

Both founders and directors of NautiBuoy have backgrounds in the Superyacht industry.

Nina Anderson started work as stewardess on large Motor yachts in the Mediterranean as well as in Mexico and the US. She was quickly promoted and soon became Chief Stewardess. In this role she naturally picked up a keen eye for guest welfare as well as perfect attention to detail. With her unique style, she has created the ultimate range of platform leisure accessories.

Clay Builder was brought up sailing in Mallorca on his fathers yacht and windsurfing school. At 18, he completed a years mariner graduate programme. After 5 years as a yacht trainer and running flotillas in Europe, he began an 11 year career on several large sail and motor yachts as Bosun, Mate and eventually Officer.

After 100s of wash downs using guest ready tenders and even more hours repairing jet ski’s and damage caused to transoms, as well as frustrating days spent looking for marina rafts, Clay realised the need for a multi-functional inflatable platform that yachts could always have access to and easily stow on board.

They both also saw the need for a stable leisure platform where guests could relax, close to the water on a floating island of comfort, or dock their jet-skis safely whilst enjoying the water sports on the yacht.

Their aim was to produce a premium quality platform of superior durability and multi-functionality. Whilst working together on a Med based motor yacht, NautiBuoy was born.
